

Risk Assessment Template for All Residents, Regardless of Vaccination Status

- Close contact with a person who has COVID-19 Yes

If “yes”, consider higher-risk.

If “no”, and fully vaccinated, assess as lower-risk and the risk assessment is complete. If unvaccinated or not fully vaccinated, proceed to the risk assessment below.

Risk Assessment Template for Unvaccinated or Not Fully Vaccinated Residents

Non-Medical Community Activities*

Assign 1 point to each “yes”:

- Indoor activity Yes
- Unable to maintain physical distancing Yes
- >5 people at activity Yes
- Duration of activity >1 hour Yes
- Unable to wear a mask during the entirety of the outing Yes

Total score _____

Medical Community Activities (dialysis, outpatient clinic, etc.)*

Assign 1 point to each “yes”:

- Unable to maintain physical distancing from other patients and visitors at appointment Yes
- >5 people in common area Yes
- Duration of appointment >1 hour Yes
- Infection control measures (hand hygiene, masking, etc.) not in place at medical site Yes
- No screening of patients in place at appointment site Yes

Total score _____

0-2 = **lower-risk activity** (ex: walk in an uncrowded park)

3-5 = **higher-risk activity** (ex: eating in a crowded restaurant)

Lower-risk: educate on infection prevention, hand hygiene, and respiratory/cough etiquette. Actively screen residents daily for symptoms, before leaving, and after returning.

Higher-risk: all in lower risk and place in quarantine for 14 days since most recent exposure if not fully vaccinated. If known exposure and fully vaccinated, place in quarantine until post-exposure testing is complete.

*Transportation to and from medical community activities should be assessed using the non-medical community activities risk assessment template and the medical visit should be assessed using the medical community assessment template. Facilities should follow the guidance associated with the higher risk assessment score.
